

Granite-Textured
Paint Specialist

Company Profile

Chapter 1

Company Background

Company Background

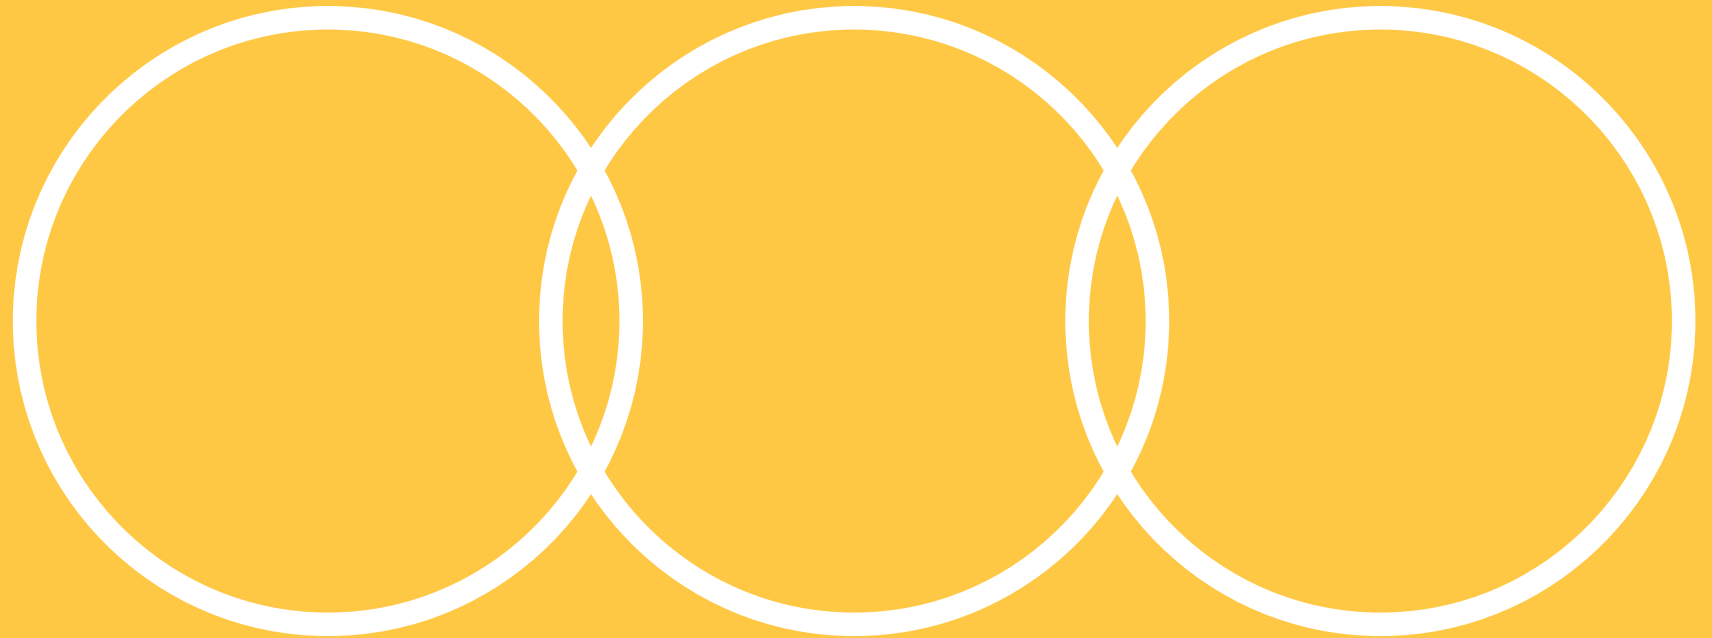

Originating from our fascination with the character of natural stone and its intricate application process, we were driven to create a revolutionary product that could address these challenges.

Supported by technological advancements and our enthusiasm for crafting beautiful creations, ADD STONE has introduced a texture paint product that not only resembles natural stone but also simplifies its application to any masterpiece you desire.

Chapter 2

Company Values

Company Values

Eco Friendly

Our granite-textured paint uses fundamental components that do not harm the environment and can be recycled (acrylic, resin, and water). These components are very low in harmful volatile organic compounds (VOCs) and do not produce waste that damages the environment.

Efficient

ADD STONE's premium granite-textured paint is not only simple and straightforward to apply, but its single-component nature also ensures ease of maintenance. When repairs are necessary, only the specific area needs attention, guaranteeing efficiency in both time and cost without sacrificing quality.

Explorative

ADD STONE makes it possible to bring the natural granite look to any surface, even the most intricate ones. It paves the way for designers and architects to infuse the elegance of natural stone into their projects, regardless of the complexity of the surface.

Chapter 3

Type of Surfaces

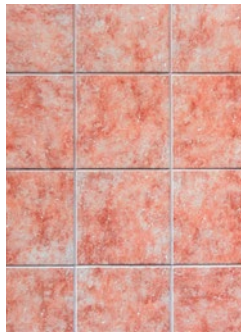

Types of Surfaces

ADD STONE Granite-textured paint can be applied on almost any surface.

Ceramic

Metal

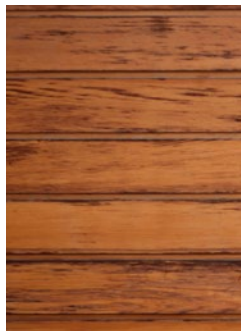

Plastic

Glass

Wood

Fiber

Concrete

Utilizing the latest technology and specialized fabrication techniques, our granite-textured paint covers any surface perfectly without compromising its durability and aesthetics.

Chapter 4

Application Method

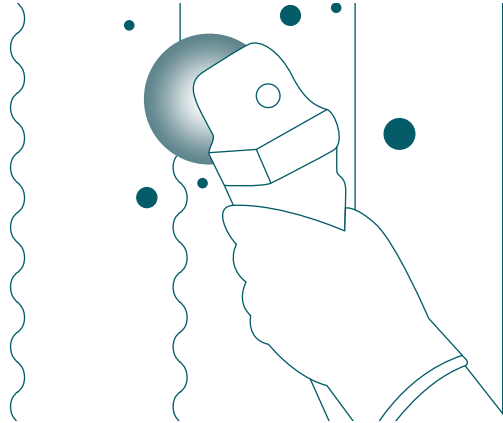

Application Method

Bring the beauty of natural granite look to any surface with just 3 steps.

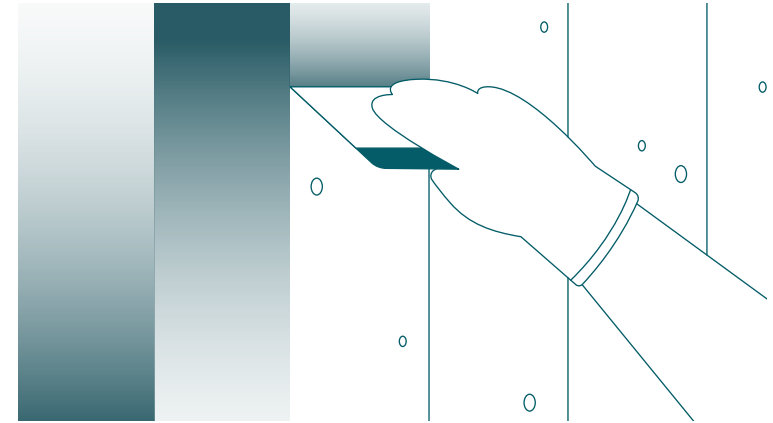

First Step

Cleanse and Prepare the Surface

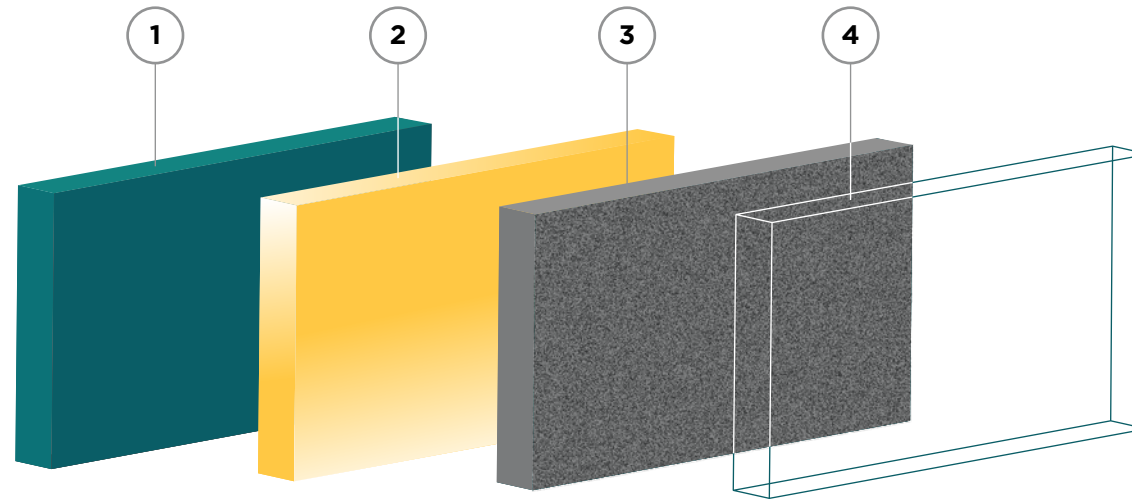

- Cleanse the surface of all dirt, debris, and oil to ensure proper adhesion to the primer.
- Smooth out protruding areas and other metal objects.

Second Step

Smooth the Surface After Cleaning

- Use Paste Filler to even out the surface.
- If there are broken or damaged parts of the surface, they can be filled first with cement.

Third Step

ADD STONE Application

ADD STONE's Granite-textured paint consist of 4 different layers:

1 Primer Layer

Used to fill pores and strengthen the base layer.

Tools : **Brush/Roller Brush**

Method : **1x Thin Layer**

2 Elastic Layer

Provides the base color and protects against potential cracking.

Tools : **Brush/Roller Brush**

Method : **1x Thin Layer**

3 ADD STONE Paint

Brings the distinctive texture and color of natural stone to the surface.

Tools : **Electric Spray Gun/Compressor**

Method : **Spray**

4 Topcoat Sealer

Protects the paint components from dirt and is easy to clean.

Tools : **Electric Spray Gun/Compressor**

Method : **1x Thin Layer**

Chapter 5

Products

Product

ADD STONE texture paint has 2 series:

➤ **AKO Series**

With small-sized granule

➤ **AN Series**

With big-sized granule

1 can of texture paint can cover an area of approximately $\pm 15 \text{ m}^2$
